ABOUT ME

A **Full Stack Developer with over 6 years of experience**, I have built a strong foundation across a wide range of technologies, including **PHP, Laravel, Node.js**, and others. I actively leverage **AI-powered development tools** such as **GPT-based assistants** and **Copilot agents** to accelerate development, improve code quality, and streamline problem-solving. My technical expertise is complemented by experience working with **international teams and clients**, enriching my understanding of diverse work cultures and strengthening my communication and collaboration skills.

EDUCATION AND TRAINING

Informatic Engineering

Tishreen University - Syria [30/09/2012 – 30/09/2018]

Address: Lattakia, (Syria)

WORK EXPERIENCE

🏢 247LiveIT – United Arab Emirates

Full Stack Developer

[15/01/2024 – Current]

- Developed a full-stack NestJS and React application for managing guard scheduling, attendance tracking, invoicing, and location-based reporting.
- Developed a full-stack NestJS and NextJS application for Tainging and watching Corses related to the Guard job .
- Spearheaded the management and redevelopment of corporate websites.
- utilizing NestJS and Next.js frameworks to enhance functionality and user experience.
- Oversaw the deployment and maintenance of web applications on AWS, managing services such as EC2 and RDS to ensure optimal performance and reliability.
- Leveraged AI-powered development tools (including GPT-based assistants and Copilot agents) to accelerate development, optimize code quality, automate repetitive tasks, and improve overall engineering productivity.

🏢 RS4IT – Saudi Arabia

Full Stack Developer

[01/01/2022 – 31/12/2023]

- Engineered numerous high-performance web applications, utilizing cutting-edge technologies to deliver robust solutions.
- Successfully fostered trust with a diverse clientele, leading to long-term agreements and sustained business relationships.
- Spearheaded the development of a comprehensive project aimed at automating all operations within a client's company.
- Identified and resolved performance issues related to loading times and database queries.
- Designed and implemented a tracking system to monitor employee movements during external missions.
- Leveraged latest technologies such as Laravel, NodeJS, MongoDB, MySQL, ReactJS, and others to develop servers and databases for website functionality

🏢 Qtech Group – Syria

Full Stack Developer

[01/01/2020 – 01/01/2022]

- I led the development of a web application for a new bank in Syria, designed to manage an Initial Public Offering (IPO).
- significant part of my role involved developing the communication between the bank's local system and the web app.
- This was achieved through the strategic implementation of an API, ensuring seamless data exchange and integration.
- In addition to development, I undertook the task of testing and maintaining the responsive design of the applications.

Android and Backend Developer

[01/01/2018 – 31/12/2020]

- I have successfully delivered scalable and high-performance software solutions to customers, incorporating modern features to enhance user experience .
- In the realm of mobile development, I have developed and maintained Android applications using both Java and Kotlin programming languages.
- In addition to front-end development, I have also maintained backend systems, including servers, databases, and APIs.

 **nasable – Sweden**

Android and Backend Developer

[01/01/2017 – 01/06/2017]

- I have developed and maintained Android applications using both Java and Kotlin programming languages, demonstrating proficiency in mobile development.
- In addition to front-end development, I have been responsible for maintaining backend systems, including servers, databases, and APIs.
- Furthermore, I have built a project management system to effectively manage tasks and projects.

PROJECTS

ReactJs Starter Library

- Architected and published **izen-react-starter**, a reusable React starter template to streamline the setup of new React projects and npm packages.
- Designed the package with modern development tooling (React, TypeScript, build scripts, bundling, consistent project structure, and configuration) to remove repetitive setup work and enforce best practices

Link: <https://www.npmjs.com/package/izen-react-starter>

Guard Scheduling, Invoicing and Reporting

- Built a full-stack web application using NestJS (backend) and React (frontend).
- Implemented guard scheduling with shift management and calendar integration.
- Automated invoice generation and support for extra charges and client billing.
- Added location-based reporting to monitor guard presence and site coverage.

MASADERJZCO

- Developed a comprehensive web application for Masader Aljazera Co. with the aim of automating all company operations.
- Developing features to automate the management of violations, rewards, and operational deadlines.
- Managing job scheduling, real-time notifications, and multiple user types to ensure smooth workflow.
- Providing comprehensive reports that include employee evaluations, completed tasks, and maintenance activities.
- Developed and designed an Android application to track employees during off-site tasks, ensuring transparency and accountability in operations.

SKILLS

NodeJS / NestJS Framework / NextJS / ReactJS / Laravel FrameWork / Mysql / Google APIs / Java / PHP / Typescript / MongoDB / Mongoose / AWS / Web Security / OWASP Top10 / Whatsapp API / Docker / Flutter Basic Skills / socket.IO / Agile-Scrum / React Native / Git (Github / Gitlab) / Redis / CI /CD / Jira / Android app development / Google (Google Ads, Google Analytics) / Expressjs / AngularJS / VueJS / Web Development: HTML 5, CSS, JavaScript / GraphQL / Firebase / GPT / Copilot AI agent / AI
